## **I. Childhood Memories**

### **a. Kinder and Elementary Days**

Held captive by something I missed 2 years of kindergarten and elementary I automatically proceeded to grade 2 student. But I could say that my 5 years' experience in elementary it shaped me into who I wanted to be and still further growing as I graduated from my Alma Mater, Pandan Elementary School.

At the school that raised my steps back then there was nothing really to do but all we knew we were enjoying the fun and cheerful days in Elementary. Teachers scolding us, basic math equations we couldn't solve, extracurricular activities to join, friends you thought to be everlasting, and the unknowing graduation. All I can say was enchanting back then.

b. *Unforgettable Experiences*

One thing that will always I remember is this unforgettable experience. The first award I was ever given to me was when I joined the journalism event I won 5<sup>th</sup> place in photojournalism and it left me an impression that built me to keep on going.

Some pictures that I've saved but most of them are already gone I remember the very first event and the very first pictures I took.

## **II. High School Life**

### **a. Slumbook**

I was an introverted person or student back in high school but still attended class. The slum book I never experienced it before since I knew it was rather an odd topic in my high school days only those in the higher sections or star section were given priority to do things and given enough attention by the teachers but in our case, since I belong to the lower section I guessed you could say it's quite sad but it made life to a student to be more meaningful.

### **b. As a High School Student**

Being in high school is a unique and transformative experience. It's a time of growth, learning, and self-discovery at least for the introverted person I am I quite get that. High school is not just about academics, but also about personal development. Building relationships, and preparing for senior high school. In high school, you have the opportunity to explore different subjects and discover your interests and passions. You get to delve deeper into subjects like math, science, literature, and history, and develop a deeper understanding of the world around you. High school is also a time to build friendships and create lasting memories. It's a time to participate in extracurricular activities, organizations, and sports where you can pursue your hobbies and develop new skills. These experiences help shape my character and teach important life lessons like teamwork, leadership, and resilience. Moreover, high school is a stepping stone toward your future. It's a time to start thinking about your goals and aspirations, and to explore different career paths.

Overall, being in high school is about embracing opportunities, making the most of your education, and growing. It's a time to learn, explore, and lay the foundation for your future endeavors. But I still indulge in campus journalism and I still going on further.

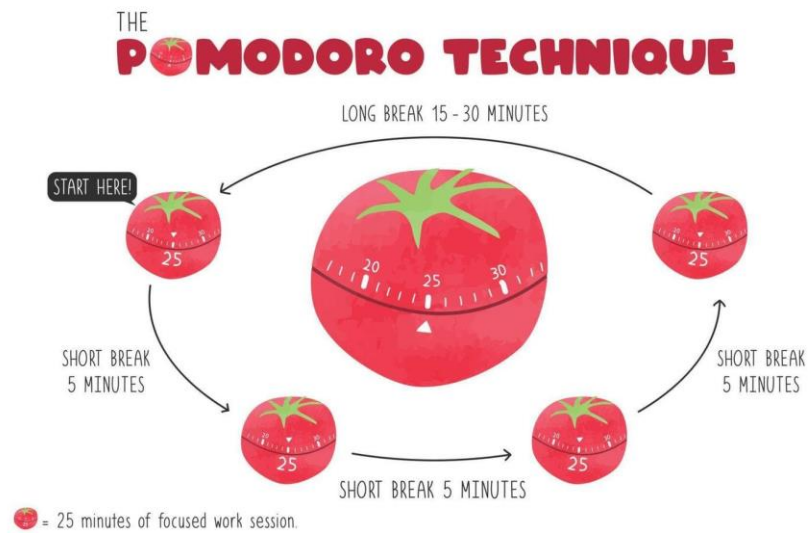

The last school event I'll ever join I didn't win but it made my high school worth remembering.

### **III. Senior High School**

#### ***a. Studies During Pandemic***

Since the 2 years, the COVID-19 global pandemic spread it has surely been a sad one not only for people who ran out of jobs and couldn't leave a foreign country because of the virus they couldn't see their families for the sake to got not infected. For the students who thought the cancellation of the class was 2 weeks ended up being 2 years I was really happy back then that took a drastic turn. But we still keep on fighting and eventually find a solution. During the pandemic, when things got easy and able to leave home and get connected again I was a grade 11 student taking up Technical Vocational Livelihood Track (TVL) major in Computer Systems Servicing (CSS) since it was online and blended modular, I focused on my studies and adapted to online learning. It was a challenging time for everyone, but I tried to make the most of it by staying organized and disciplined. I attended virtual classes, and keep studied independently to keep up with the curriculum. For me, my studies during the pandemic involve one technique Pomodoro Technique.

The Pomodoro technique is a time management method that involves breaking work into intervals, typically 25 minutes in length, separated by short breaks. As a student studying during the pandemic, the Pomodoro technique has been incredibly helpful in improving my productivity and focus. By setting a specific time frame for studying and taking regular breaks, I can maintain concentration and avoid burnout.

*b. Unforgettable Moments*

Unforgettable moments during senior high school can vary for each individual, but one common experience that many students cherish is the sense of camaraderie and lifelong friendships formed during this time. The bonds created with classmates and teachers can last a lifetime and create truly unforgettable memories. On a personal note, one of my most unforgettable moments during senior high school was when my section Technical Vocational Livelihood Track (TVL) major in Computer Systems Servicing (CSS) organized a surprise farewell party for our class advisor even though we hated her but still, she shaped us and taught us how to be prepared for college. Before the upcoming graduation, we spent weeks planning and preparing for the event, and seeing the joy and surprise on our teacher's face was priceless. It was a heartwarming moment that brought our whole section together and created the last memories of Senior High School.

I didn't have an actual photo of the section during the celebration because we were enjoying it back then but this is the first picture we took as a whole class during the culminating activity where our dearest advisor supported us and held a banner for us.

#### **IV. Study Plan as a University Student**

As a university student, my study plan involves setting specific goals for each semester and creating a detailed schedule to stay organized. I prioritize my assignments and exams, breaking them down into smaller tasks to make them more manageable. I also allocate time for studying, reviewing class notes, and completing readings. To stay motivated, I like to explore different study techniques and find what works best for me. One technique I find helpful is the Pomodoro Technique, where I work in focused 25-minute intervals followed by short breaks. This helps me maintain concentration and avoid burnout. But I will never forget coffee since I am a coffee lover I like to partner with my study plan and since I'm a university student from Iloilo, Science, and Technology University the school is no joke I must stay focused on my curriculum not that I want any awards or seek out the best I just want to survive university and make them proud.

I also make use of online resources and platforms to supplement my learning. I find that watching educational videos, participating in online forums, and joining study groups can enhance my understanding of the material. Additionally, I make sure to maintain a healthy work-life balance by scheduling time for relaxation, hobbies, and socializing. Taking breaks and engaging in activities I enjoy helps me recharge and stay motivated.

**Graph:**

A graph of a function  $f(x)$  is shown, with the x-axis ranging from 0 to 10 and the y-axis ranging from 0 to 10. The function is a curve that starts at (0,0) and increases, passing through (1,1), (2,4), (3,9), (4,16), (5,25), (6,36), (7,49), (8,64), (9,81), and (10,100).

**Equations:**

$$f(x) = x^2$$

$$f'(x) = 2x$$

$$f''(x) = 2$$

$$f'''(x) = 0$$

$$f^{(4)}(x) = 0$$

$$f^{(5)}(x) = 0$$

$$f^{(6)}(x) = 0$$

$$f^{(7)}(x) = 0$$

$$f^{(8)}(x) = 0$$

$$f^{(9)}(x) = 0$$

$$f^{(10)}(x) = 0$$

$$f^{(11)}(x) = 0$$

$$f^{(12)}(x) = 0$$

$$f^{(13)}(x) = 0$$

$$f^{(14)}(x) = 0$$

$$f^{(15)}(x) = 0$$

$$f^{(16)}(x) = 0$$

$$f^{(17)}(x) = 0$$

$$f^{(18)}(x) = 0$$

$$f^{(19)}(x) = 0$$

$$f^{(20)}(x) = 0$$

$$f^{(21)}(x) = 0$$

$$f^{(22)}(x) = 0$$

$$f^{(23)}(x) = 0$$

$$f^{(24)}(x) = 0$$

$$f^{(25)}(x) = 0$$

$$f^{(26)}(x) = 0$$

$$f^{(27)}(x) = 0$$

$$f^{(28)}(x) = 0$$

$$f^{(29)}(x) = 0$$

$$f^{(30)}(x) = 0$$

$$f^{(31)}(x) = 0$$

$$f^{(32)}(x) = 0$$

$$f^{(33)}(x) = 0$$

$$f^{(34)}(x) = 0$$

$$f^{(35)}(x) = 0$$

$$f^{(36)}(x) = 0$$

$$f^{(37)}(x) = 0$$

$$f^{(38)}(x) = 0$$

$$f^{(39)}(x) = 0$$

$$f^{(40)}(x) = 0$$

$$f^{(41)}(x) = 0$$

$$f^{(42)}(x) = 0$$

$$f^{(43)}(x) = 0$$

$$f^{(44)}(x) = 0$$

$$f^{(45)}(x) = 0$$

$$f^{(46)}(x) = 0$$

$$f^{(47)}(x) = 0$$

$$f^{(48)}(x) = 0$$

$$f^{(49)}(x) = 0$$

$$f^{(50)}(x) = 0$$
